## 1. Introduction

The Parameters section of the GenMix Pro application allows the user to manage the software. By accessing the backup section of the software, the user will be able to activate the automatic backup which will take place upon exit of the software.

**NB: to backup the custom formulas quickly, please check the help file related to custom formulas Import/Export**

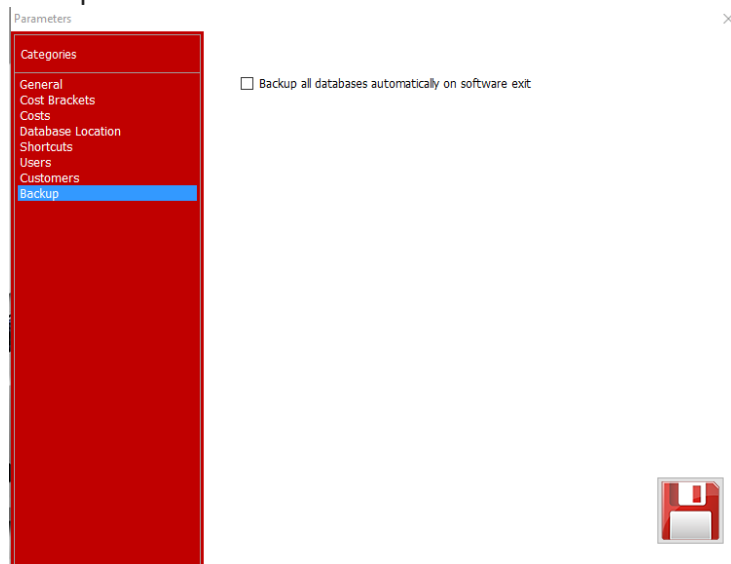

## 2. Pre-requisites

No prerequisites are required to activate the automatic backup.

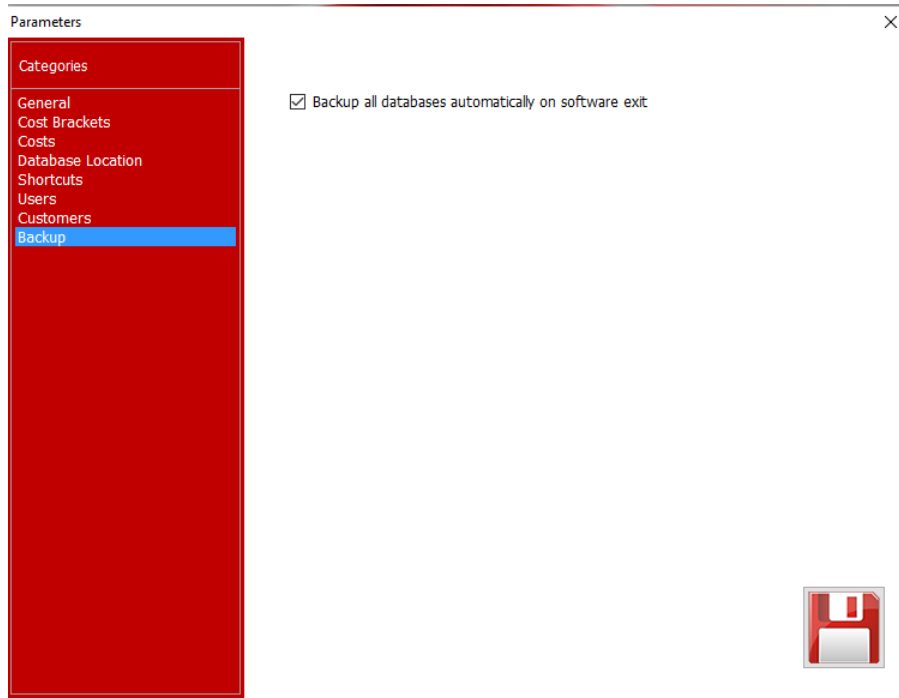

## 3. Step-by-step details

### a. Basics

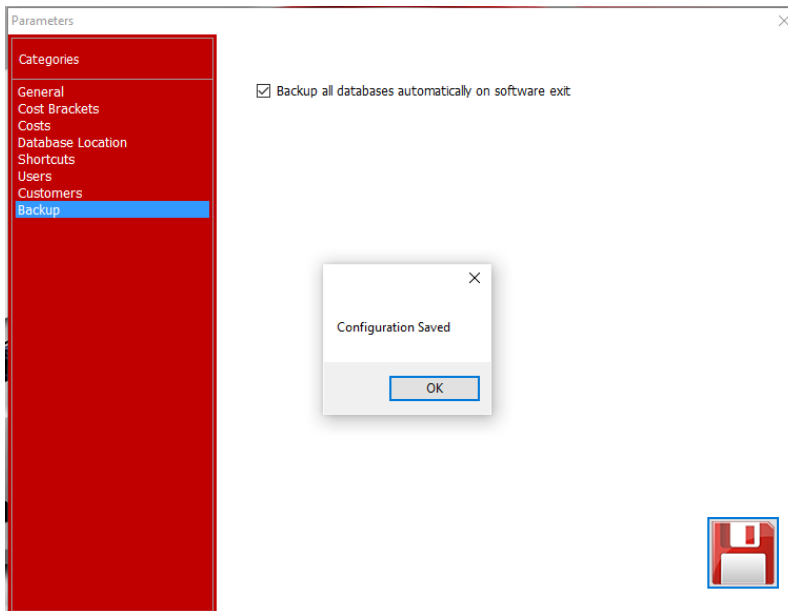

- i. Access the parameters section in the GenMix application
- ii. Click on the Backup section in the menu:

- iii. Click on the checkbox near *Backup all databases automatically on software exit*

iv. Click on the save button

v. Backup check

To ensure that the software is performing the backup correctly, do the following:

- Open one of the following folders (depending on your operating system):
  - o Windows XP: *C:\Documents and Settings\All Users\Application Data\General Paint*
  - o Windows Vista and above: *C:\ProgramData\General Paint*
- A folder called *backup* should be created automatically
- Open the *backup* folder
- There should be multiple files there as seen below (those are your backup files):

..l Users\Application Data\General Paint\backup

gp.users.dll1467628304  
DLL1467628304 File  
21 KB

mixingsys\_config.acd1467628...  
ACD1467628304 File  
59 KB

#### **4. Important Notes**

It is highly recommended to activate the backup feature

It is highly recommended to backup your files manually when uninstalling it.

**NB: to backup the custom formulas quickly, please check the help file related to custom formulas Import/Export**

#### **5. Contact information**
